u.r. = underrepresented; o.r. = overrepresented, k = counts without nectarless plants

*HD = Honeydew; ** Starchgrains in % per 300 pollen- and starchgrains counted

*** = modification: weight, **** = modification: sample preparation: volume/temperature

Conclusion:

Based on the results determined within this analysis the honey can be classified as Blüten/Blossom honey according to current EC Directive for honey.

Based on the above determined characteristics a declaration as Blüten/Blossom honey is in accordance with Art. 2 (2b) of the current EC-Honey Directive.

A declaration of the geographical origin Armenien möglich/Armenia possible is consistent with the above determined pollen spectrum given current scientific research

This examination is the basis for special decision guidance.
